

Report for Week #12

Iron Man Planner

Group: 2

Date: 4/14/2025

Location: Cline Library room 240

Present participants: Dorian, Cole (Manager), Daniel (Presenter), Travian (Reporter), Jesse, James

Missing participants: None

Project repo: <https://github.com/Oracle451/Personal-Planner>

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why.

Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!

Jesse

- No commits this week, focus on other classes.

Cole

- Add Forest theme to complete presett theme lineup in merge #128
- Commit: [6d600a680a989807828b011ce7d14c99e557b221](#)

Dorian

- Added Save And Load file feature
- Commit: [8bdea55eb6c8da2584a3223e2acdc88a57bb10c5](#)

Travian

- No commit. Had midterm

Daniel

- Adjusted the layout to better fit a potential user's interests by making the streak section appear lower and the upcoming events appear higher.
- Commit: [f99e2d3bc5b9fdc36fa37bf2bd953f4dcf02db3c](#)

James

- Added instructions for users for the Meals sidebar
- Commit: [26ee93787e64e66f731baf7c16737cbc666b6db3](#)

2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

1. **Appreciations:** We appreciate Dorian putting in a lot of effort to implement a save and load file functionality to the website
2. **Success:** We successfully polished up all of the features we wanted to implement in this project to a degree we are happy with.
3. **Failures:** While most features are polished there is still some inconsistency with how those features operate within popups.
4. **Barriers:** Because each popup was designed by a different team member they have very different styles and feels.
5. **What we should try next time:** We should attempt to make all of these pop ups have the same look so it feels familiar and consistent to the user.

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Jesse

- More unit tests for the upcoming deliverable.

Cole

- Universalize the popup menu creation process

Dorian

- Add acceptance tests

Travian

- Look at issues see if I can fix any

Daniel

- Work to implement a more refined meal system where calories are accurately tracked

James

- Add more functionality to other sidebar tasks and fix bugs
