

Report for Week #11

Iron Man Planner

Group: 2

Date: 4/7/2025

Location: Cline Library room 240

Present participants: Dorian (Manager), Cole (Presenter), Daniel (Reporter), Travian, Jesse, James

Missing participants: None

Project repo: <https://github.com/Oracle451/Personal-Planner>

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why.

Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!

Jesse

- Added new automated tests via Jest, tests for functions populateUpcomingEvents, generateDateString, fixTime, Commit: fb7492285e06fe1b69bc19dd6ffb3bc0a2377598

Cole

- Added Calorie Tracker Functionality to the sidebar
- Added a "Deep Ocean" theme and changed the default theme to be named "Clear Sky" to match its lighter color scheme.
- Commit: 0a2d75cce20c25dc702346f14ce649138f8546fb

Dorian

- Added routines tab fully functional
- Commit: df9251132cf855eedb0586be1f9b8ea5906df63f

Travian

- Implemented Lavender Theme
- Commit: 3360bc45b070507c45167af05dc413263c1c4176

Daniel

- Created a value of “remaining calories” to help the user easily see what they need to eat
- Commit: 1262fede02d81e2765287695e34d6177b8fe5e23

James

- Made the log meals menu more user friendly to use
- Commit: 5e3194accc701e7ac9b0afa0ce13f6e331a5c5a2

2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

1. **Appreciations:** We appreciate Dorian finishing the routines tab and ensuring it is in a well polished state, he also took the time to center the calendar after a previous change to the website styling made it sit to the left.
2. **Success:** This week we successfully implemented many of the remaining features we wanted for the website including workout routines and calorie tracking.
3. **Failures:** Almost all of our popup sub menus are using entirely different HTML, this is inefficient because we could be using a template popup for all submenus.
4. **Barriers:** Because we are not using a template popup it makes it more difficult to build new submenus since they have to be made from scratch.
5. **What we should try next time:** Next we should try to implement a universalized popup menu so that it can be more efficient and look more visually consistent.

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Jesse

- Make the Add Task menu more appealing and in-line with other pop-up menus.

Cole

- Work on implementing a universal popup template

Dorian

- Help Cole implement universal popup

Travian

- Add a new dark theme to have 3 light and 3 dark

Daniel

- Fix issue with pressing the close button in the custom theme popup

James

- Add save and load file functionality
