

Report for Week #8

Iron Man Planner

Group: 2

Date: 2/17/2025

Location: Cline Library room 240

Present participants: Dorian, Cole (Presenter), Daniel (Manager), Travian (Reporter), Jesse, James

Missing participants: None

Project repo: <https://github.com/Oracle451/Personal-Planner>

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why.

Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!

Jesse

- Remove and Edit Task functions created and bug fixed, commits:
5d17c5cc2197393fb752e44d29110938bd41017f,
782236b523eeb2a0b111a0b083047cb44d457b43
- General bug fixes.

Cole

- Filled in the sidebar with basic implementations of utilities and elements we planned on in the UI mockup, not fully feature complete yet. (Commit: 1eebcdfc6e80110fb56438753bc3536b59cf598)
- Made Sidebar Scroll Independently from the rest of the website

Dorian

- Added the workout tab. Within it you are able to view, add, edit, and remove workouts
- 4f96309cf3c8ba3afc1441a5d9a737d56845df5b

Travian

- Updated css to be less redundant. Changed it so more stuff is inherited and it looks better.

Daniel

- Quality assurance; was in charge of managing all of the pull requests that were made to the Github, verifying that there were no conflicts.

James

- Implemented meal logs and meal creation functions, also able to view these logged/created meals. (Commit: e8a63757813facd3ebd33c7b392bd290e80062b3)

2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

1. **Appreciations:** This week Jesse made sure that the streak counter was properly working and didn't stop until he guaranteed that it was working through each month switching.
2. **Success:** Since we have a working base for our website it makes it much easier for us to implement features on top of that.
3. **Failures:** Right now, some elements of our UI appear out of place with certain themes
4. **Barriers:** With new features being added all the time, they are not always updated to match with the multiple themes we have already set up.
5. **What we should try next time:** Next week we will try going through every aspect of the website UI and making sure it has a uniform appearance that falls in line with the themes

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Jesse

- Updating old code to be more in line with standards, adding comments to old functions so we can change them later and understand what we had done in the past.

Cole

- Work towards adding complete functionality to the features in the sidebar

Dorian

- Do routines tab to have lists of workouts to do.

Travian

- Review Website Color Scheme

Daniel

- Continue to verify all pull requests to make sure that conflicts do not arise.
- Implement a better UI system to better the image of our website

James

- Continue adding needed functionality for the site, specifically functions for the sidebar.
