Report for Week #5

Iron Man Planner
Group: 2
Date: 2/17/2025
Location: Cline Library room 240
Present participants: Dorian (Reporter), Cole, Daniel, Travian, Jesse (Manager), James (Presenter)
Missing participants: None
Project repo: https://github.com/Oracle451/Personal-Planner

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why. **Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!**

Jesse

- Finished add-Task functionality, with commits : *58a7bd1fbf68231ac9401599d43e72356b272d5a, 6ec83dea572668601a2c4649e36589e0dd7bad06, a31bc67be2c27d04397b472b4b8c7de0ba7afed1*
- Reverted theme selector function to an earlier state to increase amount of compatible browsers, commit: 9eeba471e80aa0063dce829e7bfeec77e5f7b2e9

Cole

- Confirmed exact feature functionality implementation with team

Dorian

- Changed theme feature
- 76dccdf42908ade32a6f1bee5ae3b63932fcdbe3

Travian

- Updated calendar feature to display days properly
- e20d071291a94bdd22bd95541d641f36fda3fa80

Daniel

- Adjusted hover styling for calendar (commit: fcac0bdc00003a500b862ada500e558c84bb695e)
- Added a non default font family, as well as formatted the various texts to be different sizes relative to their importance (commit: f94b5aa7dfca0080714404ae8ef468810335bde9)

James

- Was not able to add any new implementations this week.

2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

1. **Appreciations:** We appreciate Travian for taking the time to overhaul the theme selector
2. **Success:** Our successes this week involved fixing bugs like the week day headers not appearing and day hover highlighting not working properly on all themes
3. **Failures:** A miscommunication this week resulted in 2 team members committing changes to the same features and conflicts arose.
4. **Barriers:** Each team member has their own style when writing code that can be difficult for others to read at first glance
5. **What we should try next time:** Next week we will message the group chat when we begin working on certain features so that we can avoid implementing different solutions at the same time.

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Jesse

- Create a tag system for the tasks, allowing the user to add tags to categorize their tasks (Assumed actual hours, 3-4)

Cole

- Add a clear cookies button to the site so you can start fresh

Dorian

- Search for any bugs that may be present in the system

Travian

- Add a few more themes
- Clean up CSS a bit removed repeated and unneeded parts

Daniel

- Continue development of the theme, specifically finalizing colors and font types (1-2 hours)
- Format all new additional features that will be added to fit our page, as well as saving time for those working on the actual implementation (1-2 hours)

James

- Will be working on fixing new bugs and past bugs.
